

This fall the Vermont Chamber of Commerce is conducting its annual statewide tour, teaming up with local chambers, business associations and the Vermont Futures Project to build an agenda for growth by focusing on solutions to address the workforce challenge. The Vermont Chamber wants to engage with businesses and communities throughout the state to gain a full understanding of their perspective on the economy and help inform us in building our Business Agenda for the 2018 Legislative session. Be a participant and have an impact on the outcome using these forums as an opportunity to learn about the Vermont Futures Project data and legislative issues. We will answer your questions. We want your ideas to foster growth. We will create strategies that work for your organization to effect change.
